what we do

Design

Installation

Maintenance

why green roofs?

Contact Peter Dickens at
pdickens@washingtonlandscapes.com

Environmental

Green roofs reduce storm water runoff, release fewer pollutants, require little maintenance, and are sustainable for the long-term.

Financial

Green roofs insulate better than traditional roofs, reduce energy costs, protect the roof from weather, and extend its lifetime.

Social

Green roofs restore the ecological and aesthetic value of urban spaces and provide psychological benefits.

greening landscapes and beautifying communities since 1987
