Green Walls

for commercial properties in VA, DC & MD

what we do

Design. Install. Maintain.

why green walls?

Environmental

Green walls reduce storm water runoff, release fewer pollutants, require little maintenance, and are sustainable for the long-term.

Financial

Green walls insulate buildings and large walls, reduce energy costs, and protect the building from weather, thereby extending its lifetime.

Social

Green walls restore the ecological and aesthetic value of urban spaces and provide psychological benefits.

greening landscapes and beautifying communities since 1987
